

6. (Currently amended) An multi-point testing apparatus for testing electric properties on a specific location of a test sample, comprising:
- a. A electrical feedback detection system according to claim 1-5;
 - b. Means for receiving and supporting said test sample; and
 - c. Electric properties testing means including electric generator means for generating a test signal and electric measuring means for detecting a measuring signal.

REMARKS

The above preliminary amendment is made to insert an abstract page into the application and to remove multiple dependencies from claims.

Applicant respectfully requests that this preliminary amendment be entered into the record prior to calculation of the filing fee and prior to examination and consideration of the above-identified application.

If a telephone conference would be helpful in resolving any issues concerning this communication, please contact Applicant's attorney of record, Michael B. Lasky at (952) 253-4106.

Respectfully submitted,
